Environmental Restoration Internship Summer 2017

Desired: A college student in Environmental Studies or similar field to assist with restoration projects on lands that have been protected for their conservation value. Experience with plants is preferred. Applicants should demonstrate a commitment to conservation and community service and a desire for hands-on experience in scientific and land management projects.

About the Pound Ridge Land Conservancy (PRLC): The PRLC is a non-profit land trust that owns and manages over 350 acres of wild land in Pound Ridge, New York. Our preserves are home to thousands of plants and animals and are managed for the preservation of biodiversity as well as for the visiting public. PRLC's hub is located at the Armstrong Preserve and Education Center, 1361 Old Post Road in Pound Ridge, NY. This is an off-the-grid facility where interns and volunteers learn environmentally sustainable practices and assist in educating others. For more information, see our website, prlc.net.

Primary Responsibilities:

1. Assist with management of our native plant nursery, including regular watering, weeding, transplanting, insect control, and production of compost. 30%
2. Plant and/or maintain restoration areas on nature preserves. 30%
3. Document progress on restoration sites with photographs and maps. 10%
4. Collect data and seed for long-term conservation research projects and biodiversity inventories. 10%
5. Assist in outreach programs to engage the public in our work. 10%
6. Prepare a slideshow and summary report on the internship experience. 10%

Training and Supervision: Interns will be trained and supervised by PRLC's Land Steward & Educator, Krista Munger. The Restoration Intern will work alone at times and also as team leader of other volunteers. He/she will be expected to develop and carry out a schedule for daily and weekly tasks, including reports to the Land Steward & Educator.

Qualifications: Candidates will have an educational background in the natural sciences and experience in the outdoors. Gardening experience is preferred. Applicants should be capable of working full or half days in the field (in the heat, amidst insects and other wildlife) and must be able to use hand tools.

Schedule: The internship runs for ten weeks. Interns may start on May 31 and take one week's vacation, or start June 7 and work until August 16. Work days are generally 5 days per week, choice of days Monday through Saturday, 9am to 1pm. Interns are required to attend a public presentation of our work on August 16, 6pm-9pm.

Compensation: A stipend of \$1250.00 will be provided. Housing is not offered for this internship and must be arranged by the applicant.

To apply: Email a resume and cover letter by 4/1/17 to Krista Munger at landsteward.educator@prlc.net. Please specify that you are applying for the Environmental Restoration Internship and **please label attachments with your name.**
